

Foster Career-Readiness *with* Holistic Assessment *and* Learner Agency

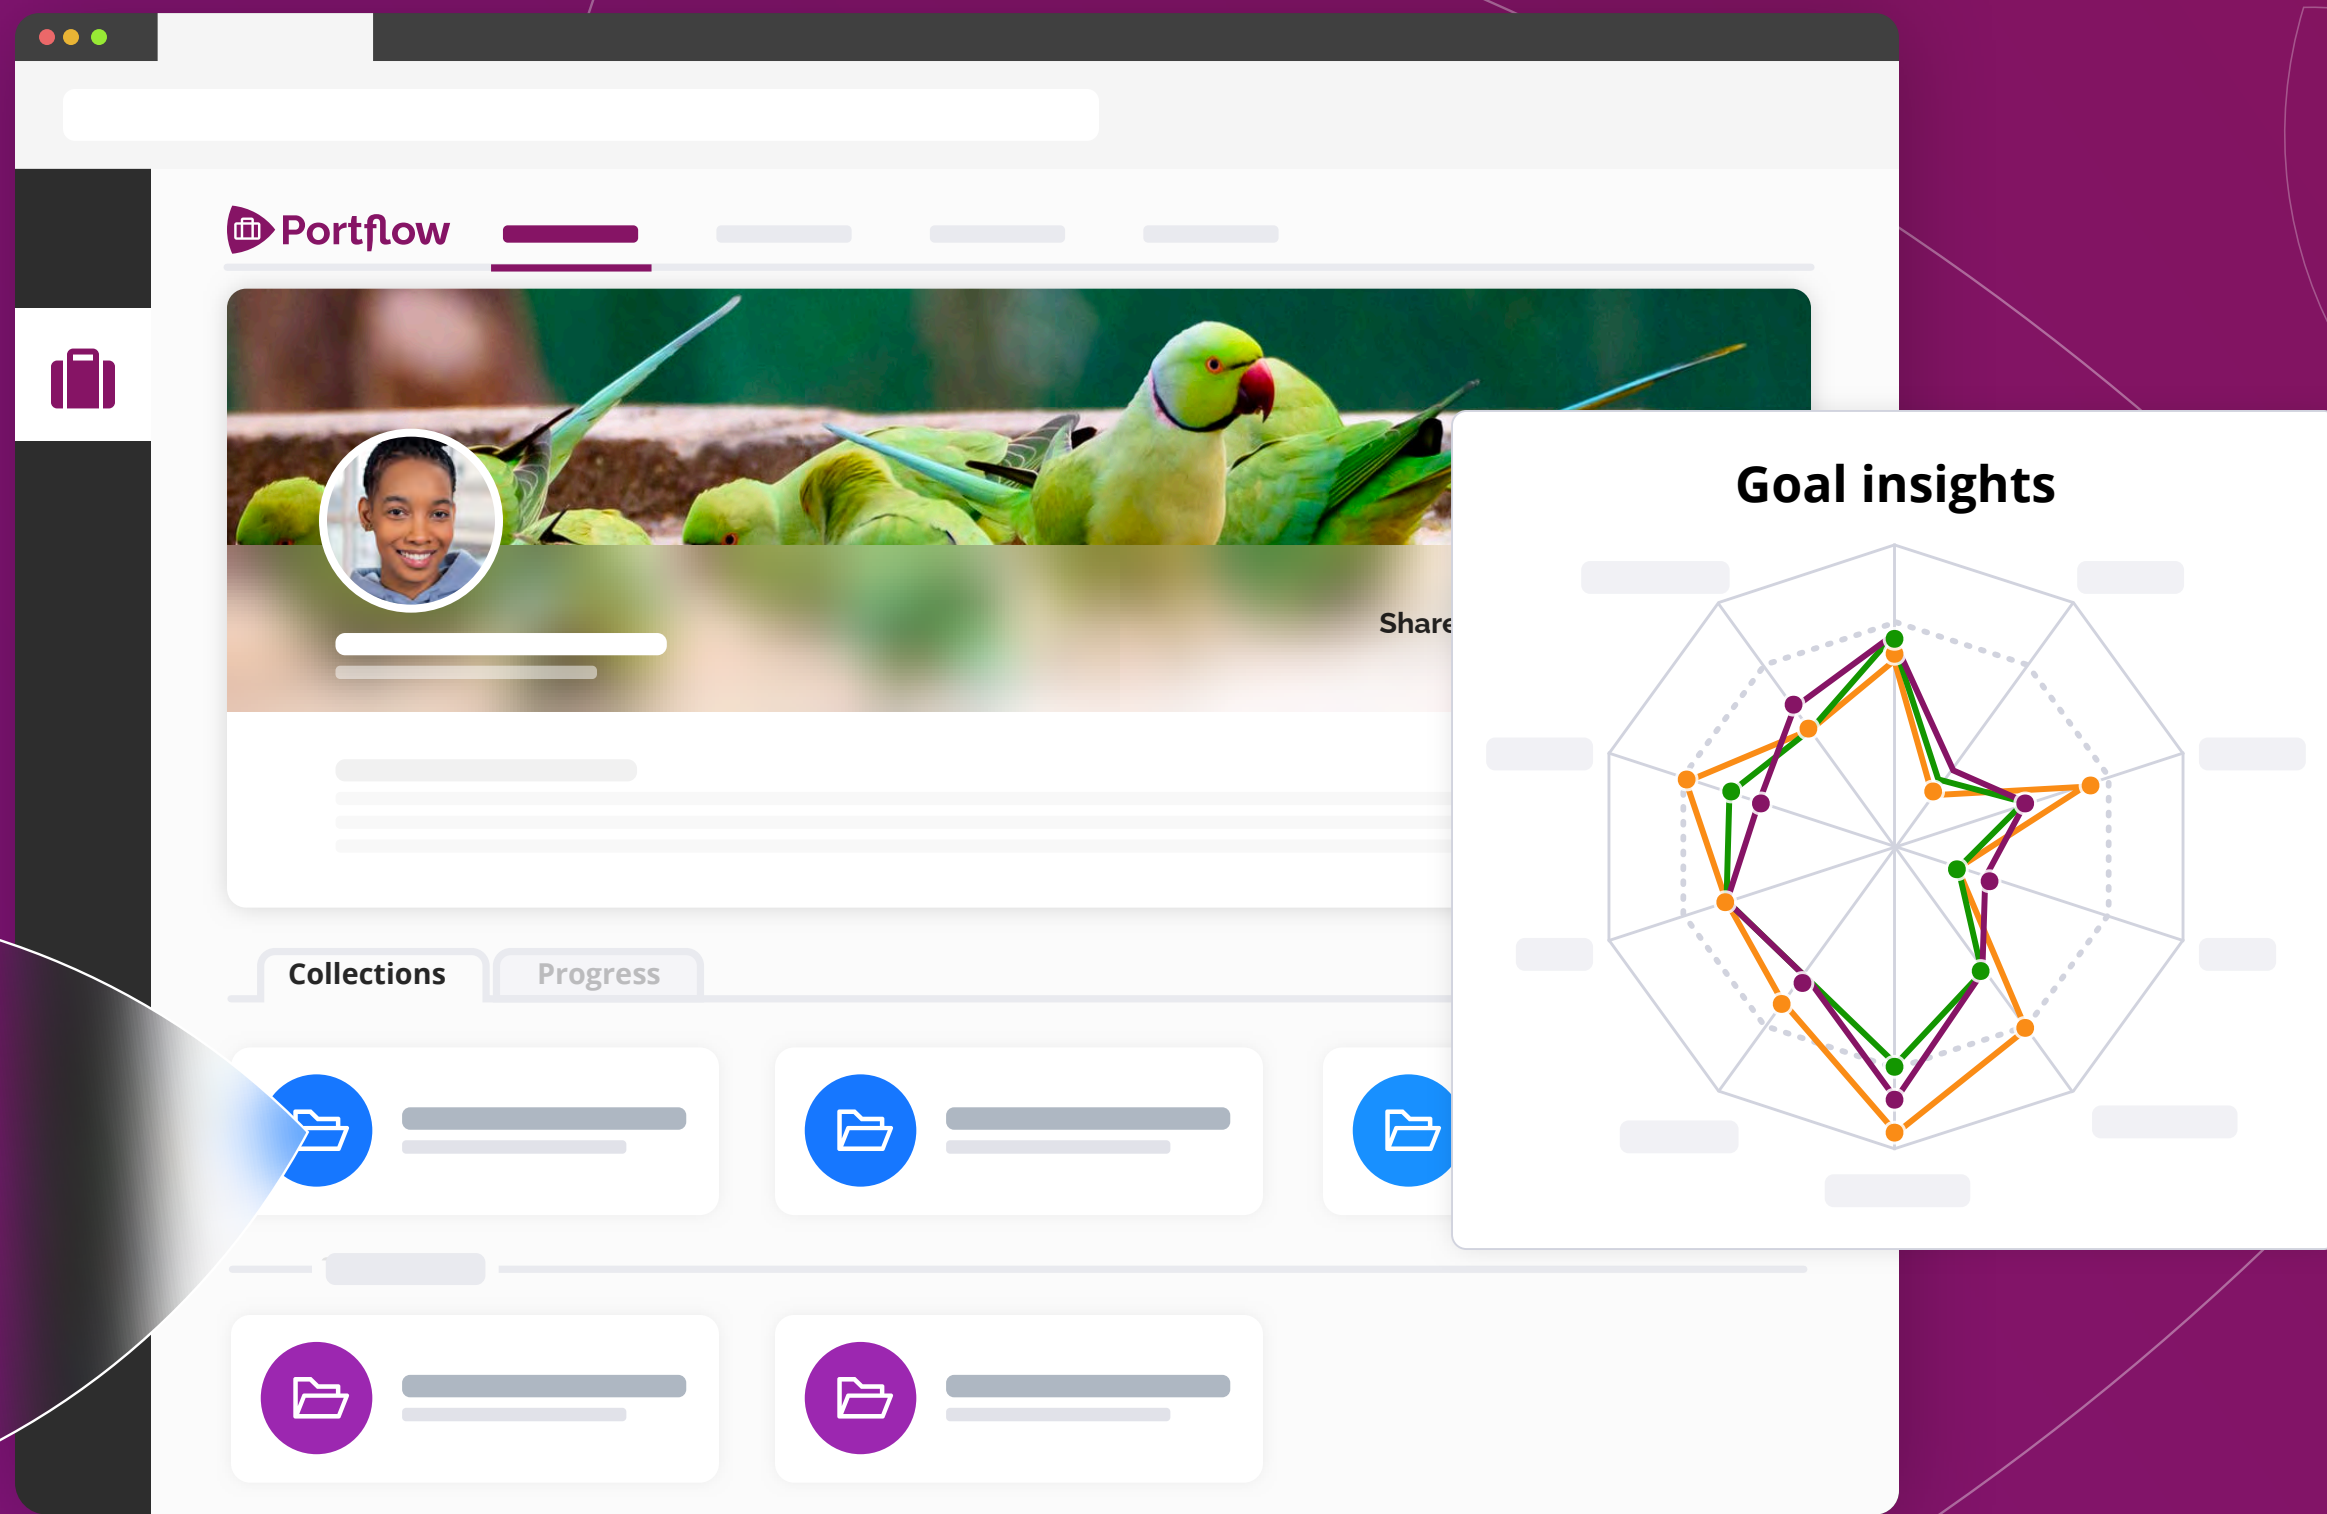

SYNERGIZED WITH

**CANVAS**

BY INSTRUCTURE

Portflow is the overarching learning experience portfolio for holistic assessment and learner agency, seamlessly integrated with Canvas LMS.

Portflow enables your institution to:

Use **Holistic Assessment** ...

- Centralize *program-level* **competencies, outcomes** and **skills**
- Focus on **formative assessment**, separating *marking* from *feedback*
- Evaluate the **process of growth** in *flexible journeys* and *reflective practice*

... and foster **Learner Agency** ...

- Teach students to take **responsibility** as the key to success in *Lifelong Learning*
- Stimulate **ownership** and **sense of control** through *self-regulated learning*
- A personal learning journey with **adequate scaffolding** along the route

... to build the skill-set for career-ready professionals.

What makes Portflow unique:

1 Portflow **ties together all learning experiences**, from the entire learning journey. It unifies the artifacts *and* feedback from learning processes *and* results from all learning contexts such as courses, modules, projects, and extracurricular activities.

2 The student can build their portfolio by linking these artifacts as evidence to their **goal framework** of personal and program-wide skills, outcomes, and competencies (e.g., graduate attributes).

3 During this **iterative process** of collecting, structuring, and relating artifacts, the student can invite **any relevant stakeholder** from inside and outside the institution in their learning process to provide **valuable insights** in the form of **rich feedback** and progress evaluations.

4 Progress and growth towards mastery are **trackable and visualized** for both students and coaches, allowing for adequate scaffolding, guidance and reflections. In addition, narrative feedback is presented in an aggregated overview.

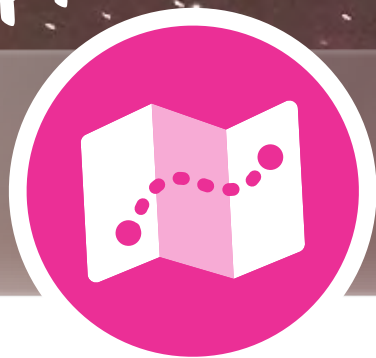

5 Students, coaches and instructors remain in their trusted learning environment through the **synergy with Canvas**, without the need to open new tabs or sign in elsewhere. Students can import Canvas assignment submissions, including received feedback and rubrics as evidence. They can invite other Canvas users to their portfolio, and summative assessments can be graded within Canvas: a seamless experience that goes far beyond integration. External users can easily and securely access shared portfolio's without a Canvas account.

6 Easily create showcases, exports, or add an **alumnus login** to keep using the portfolio after graduation.

What are others saying?

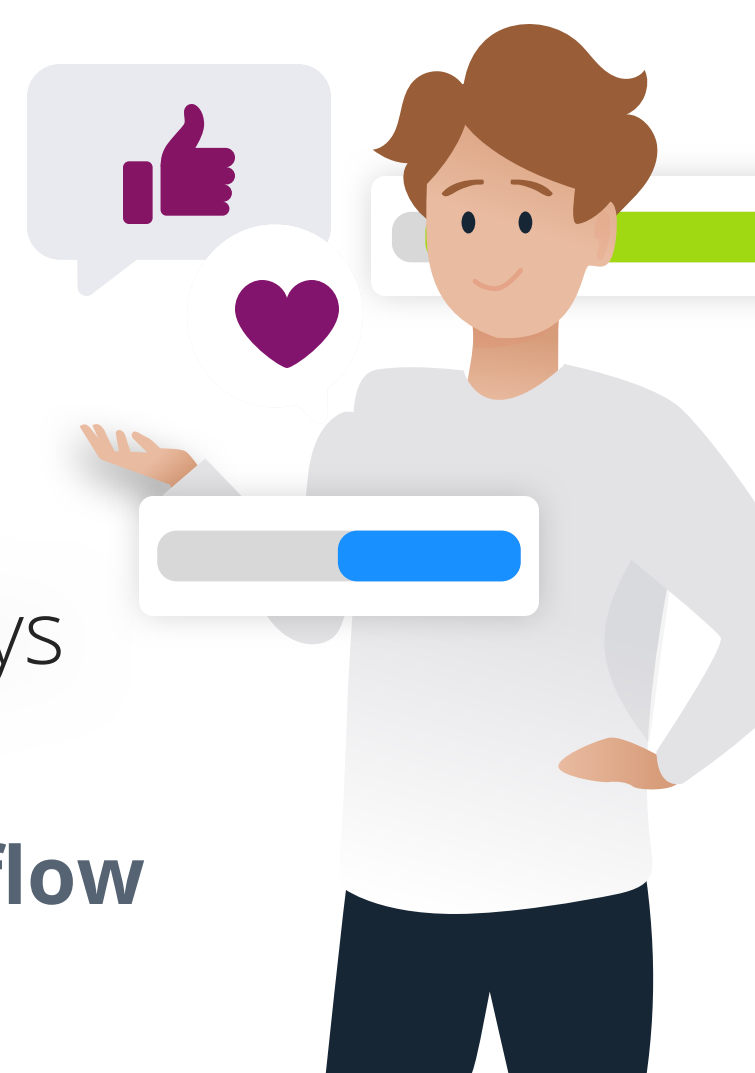

"The integration of Canvas and eportfolio in one system has enriched the learning environment for our students"

- Bernolf Kramer, Education Innovator & VLE Coach @ Fontys

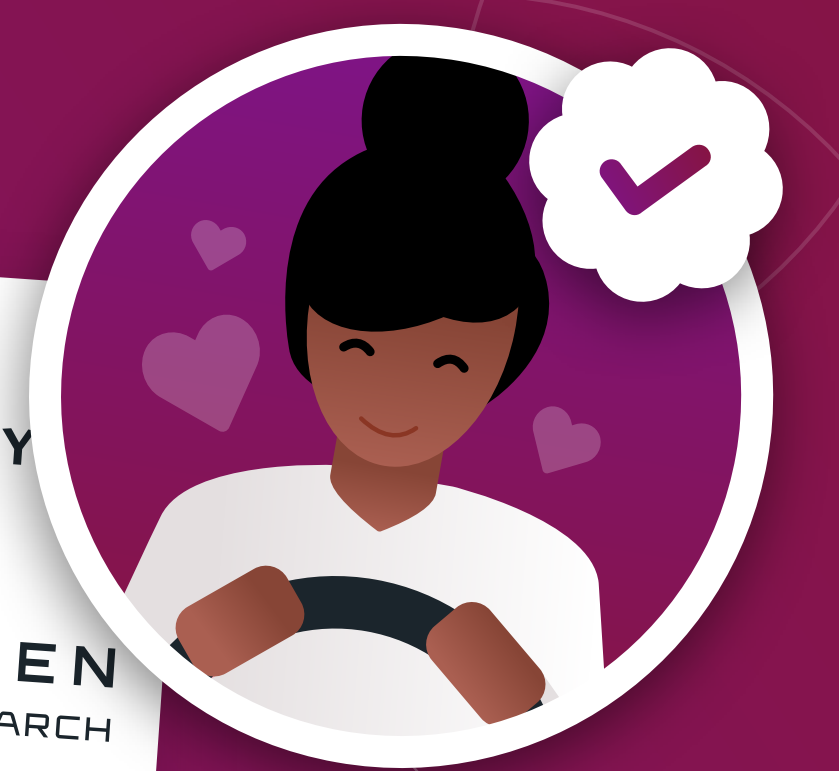

"At Fontys University of Applied Sciences ICT, the student is the owner of their own learning process. This means that the student can also determine which deliverables they produce to demonstrate their learning outcomes. We were looking for a portfolio tool that could facilitate this. We found this in Portflow."

- Robin Agterberg & Michael Schifferling, Teachers @ Fontys
